EFDA Course Description

The EFDA program is designed to prepare Certified Dental Assistants or Licensed Dental Hygienists to apply for the Expanded Functions for the Dental Auxiliary (EFDA) board examination administered by the Commission on Dental Testing in Ohio and to provide experiences for quality, knowledgeable patient care as an entry level EFDA. This course includes 200 hours of instruction, progressing from pre-clinical laboratory activities to faculty supervised clinical experience in The College of Dentistry at The Ohio State University.

The EFDA CE course is offered ONLY to Licensed Dental Hygienists and Certified Dental Assistants. Proof of current licensure/certification must be submitted with application. All applicants must complete the EFDA pre-requisite course "Tooth Anatomy for Dental Auxiliary" before an application will be considered.

Admission is competitive and based on quality of application.

Prerequisites

- Current CDA or RDH
- Minimum two years chair-side patient treatment experience
- Successful completion of Ohio State CE course "Tooth Anatomy for the Dental Auxiliary"
- Complete application

Curriculum Overview

Pre-clinical sessions (January – April)

The pre-clinical laboratory instruction session provides 104 hours of lecture/demonstration and activities on FRIDAYS from January through April. Didactic instruction includes: review of tooth morphology, properties and manipulation of dental restorative materials including bases and liners, techniques and procedures for restoring teeth with amalgam and tooth colored direct restorations. Participants place, contour, finish and evaluate restorations in prepared teeth which are mounted in typodonts. Activities also include rubber dam replacement, dental sealant application, and finishing and polishing amalgam restorations. Course participants complete approximately 100 restorations in typodont teeth during the pre-clinical session of the course.

It is our policy that successful completion of the pre-clinical course is a prerequisite for continuing into the clinical session. A series of weekly skill tests will be given throughout the laboratory course to assure participant progress and pre-clinical proficiency before the treatment of patients is permitted. Participants must demonstrate competency in restorative
expanded functions by passing weekly competencies and a final pre-clinical competency examination with instructor recommendation, in order to enter clinic.

If failure of final competency examination occurs, the participant may not be able to continue onto the clinical portion. If the participant is determined by the faculty members to be remediable, additional lab sessions will be required and additional instructional fees will be charged.

Clinical sessions (May – July)

In order for a candidate to be eligible to sit for the Ohio EFDA board examination, Ohio requires clinical experience in placing restorations. Participants in this course complete 80 hours of clinical training in the College of Dentistry Comprehensive Care Pre-Doctoral Clinics. EFDA students practice four-handed dentistry skills and complete restorative procedures which have been treatment-planned and prepared by pre-doctoral students. All procedures are supervised and evaluated by college of dentistry faculty.

Assignments for the clinical sessions are made in January to allow appropriate notice for students to arrange work schedules around their assigned clinic day. The class will be divided into smaller groups and students will be assigned to a specific weekday for the 10 week clinical portion from May-July.

Review sessions (early August)

Written and typodont-based mock board examinations will to prepare students for the Ohio EFDA Board examination.

Attendance Policy

Participants must attend ALL scheduled course sessions, including the board review course tentatively scheduled in early August. This course is designed to prepare participants for the Ohio certifying typodont-based practical and written examinations tentatively scheduled in August 2017. Didactic and laboratory review, as well as mock board examinations are included to help participants prepare for the board testing situation. Participants who fail to meet attendance requirements will not be certified by The Ohio State University College of Dentistry to take the EFDA board examination.

Fees

The course fee includes all instructor fees, instructional materials, laboratory supplies, and instrument rental. The two-day review course held in August is also included in the course fee. However, participants MUST supply all instruments and materials for the board review course, just as will be required for the Ohio EFDA examination. This includes all necessary equipment and supplies required for placement of BOTH amalgam and composite restorations.
Additional Requirements

Participants accepted into the EFDA program are required by the University to provide documentation of current vaccination/immunization records including, but not limited to, influenza, TB, Hepatitis B, MMR, chickenpox/varicella, and TDAP. Current CPR certification (from the American Heart Association, the American Red Cross, or the American Health and Safety Institute) is also required.

In addition, participants are required to complete several self-paced online training modules in the areas of HIPAA, Hazcom, Risk Management and OSHA. These modules are provided by the college at no charge to the participants.

Frequently Asked Questions

Q: Where do I get the application?
A: Applications for the 2017 EFDA program will be available in May. You will be able to access a copy at www.dentistry.osu.edu/ce.

Q: What are the admissions criteria for the EFDA course? (Applicants must meet the criteria below when their application is submitted.)
A: Applicants must be Certified Dental Assistants or Licensed Dental Hygienists when the application is submitted. A complete and accurate application form must be submitted by the date specified. Incomplete or late applications are NOT reviewed for admission. If certification or licensure is pending at the time of application, submit proof that documentation is forthcoming. The personal statement must show knowledge and understanding of the role of an EFDA in dental practice. In addition, the applicant must show a commitment to spend the necessary time required to complete the course. The employer’s recommendation must include a statement of support for the applicant, including allowing the EFDA student access to a dental operatory/laboratory space to complete homework assignments. The applicant must have dental office experience which includes a minimum of 2 years chair-side patient treatment. (EFDA students must be very familiar with restorative dental procedures.) All applicants must complete the OSU CE course "Tooth Anatomy for the Dental Auxiliary” prior to application and admission.

Q: How much time is required outside of class?
A: This course is very demanding of the student's time and energy. Attendance is required for ALL scheduled lecture, laboratory, and clinical sessions. Weekly homework assignments include reading the textbook and manual, as well as completing specified restorative procedures on the typodont. Students must have access to a dental operatory/laboratory space where they can restore typodont teeth with both amalgam and composite materials. Written quizzes and practical examinations are given every week during the pre-clinical course. Students continue to practice on typodont teeth, in preparation for the certifying board exam, throughout the clinical portion of the course and are highly encouraged to practice on their own.

Q: What is the 2017 EFDA course fee?
A: Course fees for 2017 are TBD.
Q: What is included for the course fee?
A: All instructional materials are provided, including: textbook, course manual, Kilgore typodont and prepared teeth, all necessary restorative materials and supplies needed to place restorations. Dental instruments and handpiece to be used for typodont procedures are on loan until the review portion of the course. All clinic instruments and supplies are provided through the College of Dentistry clinics for patient treatment. The fee also includes parking.

Q: Is financial aid available through The Ohio State University?
A: No, unfortunately Continuing Education courses do not qualify for financial assistance through the University. However prospective students may apply for a scholarship through the Ohio Dental Association Foundation (ODAF) by completing/submitting an application by July 1, 2016. Any scholarship awards remain pending until acceptance into the EFDA program. ODAF scholarship application link: http://oda.org/community-involvement/oda-foundation/odaf-grants-and-scholarships/

Q: What can I do while I wait to apply for the course?
A: Obtain or update your certification (dental assistants) or licensure (dental hygienists). Your credentials MUST be current when you apply for the course. Find out as much as you can about what an EFDA in Ohio can do. Talk with a certified EFDA. Observe an EFDA during a typical work day.

Q: How do I become a Certified Dental Assistant?
A: Contact either DANB or ODAA (information available on the links section below)

Q: What can an EFDA in Ohio do?
A: Contact the Ohio Dental Board to find current laws and rules governing EFDA practice in Ohio.
